

Hand Sanitizers

Dermigiene[™] Instant Hand Sanitizer

Dermigiene Instant Hand Sanitizer rapidly kills harmful micro-organisms on the hands within seconds. It reduces the risk and/or chance of cross infection and is used when hands are physically cleaned but in need of rapid disinfection. Instant Hand Sanitizer offers a broad spectrum of activity against bacteria and viruses, including MRSA. Dermigiene Instant Hand Sanitizer has been dermatologist tested and clinically proven to be effective.

ACTIVE INGREDIENT: 65% Ethanol

- Dye and fragrance free formulation for sensitive skin
- Formulated with moisturizers to prevent dry, irritated skin
- Fast, broad-spectrum antimicrobial efficacy
- Effective against MRSA and VRE
- Compatible with CHG, latex gloves and Dermigiene brand lotions and creams
- Gel formulated for cost effectiveness
- Ideal as an adjunct to hand washing when soap, water, and access to sinks is not readily available
- No towels required
- Patented Dispensing Systems provide economical and safe delivery of product

Dermigiene[™] Instant Hand Sanitizer

Dermigiene Instant Hand Sanitizer is an excellent choice to complement hand hygiene programs in today's changing healthcare environment. Research studies show that alcohol based hand disinfection has an important role to play in the fight against nosocomial infections.
